Project Backlog

As a busy Engineering student, I want to play more basketball, so that I can relieve stress from college classes.

As an aspiring high school athlete, I want to practice playing baseball, so that I can join the high school baseball team.

As a player, I would like to know what nearby parks or public areas are available, so that I can start pick up games.

As a varsity basketball player, I want to play basketball with new people, so that I can be more involved in my community.

As a user, I want to play more team sports, so that I can make and have friends.

As an obese teenager, I want to lose weight by playing soccer, so that I can avoid being bullied.

As an app admin, I want to be able to communicate with a database, so that I can keep records of all information within the app.

As a player, I want to be able to create a profile that shows my age, skill level, and interested sports, so that I get notified when a related game is started.
